

The Seller's Advantage

INSIDER'S GUIDE

Most homeowners are leaving thousands \$\$\$ on the table, and it's not because of the market.

This guide is for educational purposes only, specific to Calgary, Alberta.
It should not be considered legal or tax advice.

The Truth About Selling Your Home

Selling your home is one of the biggest financial decisions you'll ever make.

Most homeowners go into it without the full picture. They overspend on the wrong things. They underprepare for the right ones.

This guide changes that.

Inside, you'll find exactly what we tell our own clients before they list — the upgrades that move the needle, the mistakes that quietly cost thousands, and the marketing plan that makes sure your home doesn't just sell, but sells for what it's worth.

What's Inside:

- 4 simple upgrades under \$1,000 that make buyers pay more
- What NOT to do before you list — and why it matters
- Our marketing plan — what we do differently to get you more

4 Simple Upgrades - Most Sellers Overlook

Buyers decide within 90 seconds of walking in. These 4 upgrades make sure those 90 seconds work in your favour.

(1) Fresh Neutral Paint \$\$\$

The single highest ROI pre-sale upgrade. Buyers will pay a premium for a home that feels new and move-in ready.

(2) Curb Appeal Refresh \$\$\$

Buyers form their opinion before they walk through the door. New house numbers, fresh mulch, a power-washed driveway, trimmed hedges, and a new front door handle.

(3) Modern Light Fixtures \$\$\$

Dated fixtures age a home more than almost anything else. Swapping old brass or builder-grade fixtures for modern matte black or brushed nickel makes buyers perceive the home as updated.

(4) Refresh Your Kitchen \$\$\$

Cabinet handles and drawer pulls are the jewellery of your kitchen. New hardware costs \$2–\$5 per piece and can make a 10-year-old kitchen look recently renovated.

What NOT to Do Before You List

Knowing what to fix is half the battle. Knowing what to leave alone is the other half.

✗ Don't Do a Full Kitchen or Bathroom Reno

This is the most expensive mistake sellers make. A \$25,000 renovation rarely returns \$25,000 at sale. Spend smart. Not big.

✗ Don't Repaint in Bold or Trendy Colours

What you love, buyers may not. A deep navy accent wall or a bright kitchen might be stunning to you — but it immediately puts a "repaint cost" in the buyer's head. Stick to warm neutrals.

✗ Don't Declutter Halfway

A half-decluttered home looks messier than a full one. If you're going to clear it out, commit. Rent a storage unit if you need to. Buyers need to see the space — not your stuff. Clutter shrinks rooms. Empty space sells square footage.

✗ Don't Make Repairs Without Consultation

Some repairs add value. Others open doors to renegotiation. Before you spend a dollar on anything structural or mechanical, talk to us. We'll tell you exactly what's worth fixing and what to leave alone.

Our Marketing Plan

Most agents list your home and wait. We don't wait. We work.

(1) Social Media Marketing

We create and post a full listing tour across Instagram, Facebook, and other platforms. In a world where buyers scroll before they search, this puts your home in front of the right people.

(2) Open Houses

We host open houses on weekends to maximize your property's reach and bring serious buyers through the door. Every showing is followed up with direct outreach — because the right buyer sometimes just needs a second conversation.

(3) Off-Market Buyer Network

While your home hits MLS, we reach out directly to our network of active and pre-approved buyers. More interest from day one means more competition — and competition is the only thing that drives your final price up.

(4) Professional Measurements & Photography

Every room accurately measured, every space professionally photographed. We don't cut corners on the basics — because your listing's first impression is made before a buyer ever steps through the door.

Your Neighbours. Your Realtors.
